## Email to Neway Precision

---

Subject: Revolutionary Bio-Scalar Device - Manufacturing Partnership Inquiry

Dear Clyde,

I'm reaching out regarding a revolutionary new device concept that requires

capabilities only Neway Precision can deliver.

The GlyphMap J.D.R. is a Bio-Scalar Satellite Communication Node - the first

device to integrate telecommunications, frequency medicine, and post-quantum

computing. Our architecture requires:

- Multi-material 3D printing (conductive + dielectric + piezoelectric)
- Toroidal Rodin coil geometry embedded in chassis
- Monolithic construction - no assembly, the device is "grown"
- Nano-resin composites with specific harmonic properties

We're seeking a manufacturing partner who can:

- Prototype the first 10 units within 90 days
- Scale to 100 units for alpha testing
- Grow with us to 10,000+ unit production

Attached is our technical blueprint. I would welcome a call to discuss

whether this is within your capabilities.

Best regards,

Michael Laurence Curzi

Subject: White-Label Satellite Integration - GlyphMap J.D.R. Partnership

Dear LoveMyPod Partnerships Team,

We are developing the GlyphMap J.D.R. - a revolutionary Bio-Scalar Satellite

Communication Node that requires native satellite connectivity.

Our device is designed for:

- Global coverage (Starlink Direct-to-Cell integration)
- Lossless audio transmission (medical-grade Linear PCM)
- White-label network branding
- 60-second GPS/vitals beacon keep-alive

We need an ISP partner who:

- Refuses to compress our signal

- Can provide APN lock and VPN tunnel
- Offers white-label billing integration
- Has global satellite reach

Our target market includes EMF-sensitive users, biohackers, wellness practitioners, and remote/off-grid communities - all of whom prioritize connectivity quality over cost.

I would welcome a conversation about partnership structure.

Best regards,

Michael Laurence Curzi
